About me

From the moment I produced “Hello World” in the console of my first application, I knew I was hooked into the world of software development. It has never been “just a job” for me, it’s offered an engaging challenge to continually learn and improve my skills in creating high-quality tools. It has become a full-fledged passion that only gets more exciting as the months go by.

Below you’ll find some of the various projects I’ve completed that showcase my skills and general background in developing software

Experience

Chat App Illustration (bit.ly/Chat-App-Css)

Responsive chat app illustration with pure CSS, added some interactivity, animations and custom styles to the illustration’s formulary. Which makes it fun to interact with!

Interactive Statistic (bit.ly/Css-statistic)

Beautiful interactive statistics made with pure CSS. Using the svg’s polyline option to draw the statistic and help capture data.

The pyramid (bit.ly/The-pyramide)

Pyramid animation with pure CSS, using keyframes to accomplish the path shadow and sun animation

Fylo landing page (bit.ly/Fylo-two-column)

Built using semantic HTML5 Markup, CSS custom properties, absolute positioning, flexbox, CSS Grid, mobile first workout

Education

2020 High School – Colegio Julio Suarez Lozada, San Cristóbal City, Venezuela.

Current – FreeCodeCamp : Responsive Web Design

Current – FreeCodeCamp : JavaScript Algorithms and Data Structures

Current – Udemy : Full Web Development with HTML5, CSS3, JS AJAX PHP and MySQL
